

TransCanada *Automatic* Truck Wash

Home of the 8 minutes
semi wash

Keeping you on the Road

Our "industry first" truck wash is state of the art. From start to finish we can wash your rig in less than 10 minutes. This fully automatic, touchless system uses recycled water and biodegradable soaps and supplies.

TransCanada Automatic Truck Wash is revolutionizing the truck washing industry. Located in Lloydminster, Alberta our state of the art truck wash is designed to keep you where you are making money.....on the road.

Your rig can carry thousands of pounds of mud, snow, salt, and dirt. Utilizing our "Mega Wash" system we use a high volume of water on the body and especially the undercarriage. This excess weight affects fuel economy, safety, and reflects poorly on your company. TransCanada Automatic Truck Wash gets you back on the road in minutes.

TransCanada Automatic Truck Wash is North America's largest automatic truck wash serving the heavy truck and light vehicle market. Our two tunnel system is fully automatic. The heavy truck wash can wash any vehicle up to 8 ft 6 inches wide and 13 ft 10 inches tall. Our light vehicle wash tunnel can wash your car, van, or truck in less than 3 minutes. Both washes are completely touchless and use a patented combination of high volume, low pressure water applied to the body and undercarriage of your vehicle.

Environmental responsibility is high priority at TransCanada Automatic Truck Wash. Our system is completely self contained, using recycled water. Our water system uses a combination of softening, EQ module cleaners, and reverse osmosis, ensuring that the water used to clean your vehicle is extremely high quality. The water that we lose is what leaves on your vehicle.
